

# PDF Extraction Test Document

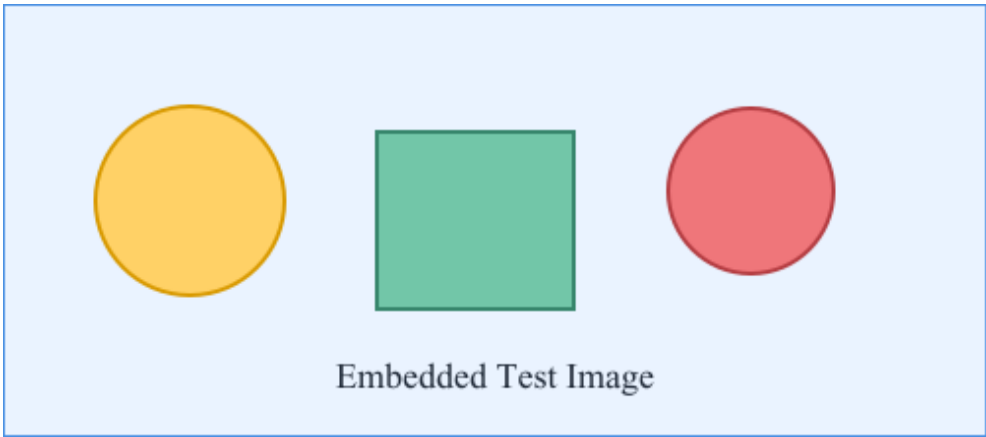

This PDF is intentionally designed to test document ingestion. It contains normal selectable text, a structured table, and an embedded image. The text section includes multiple sentences so text extraction can be verified.

**Normal Text:** The Internet of Things (IoT) connects physical devices to networks so they can collect, exchange, and process data. A typical IoT system may include sensors, a microcontroller, connectivity, cloud services, and an application layer.

## Sample Table

| Device              | Type       | Status    | Value    |
|---------------------|------------|-----------|----------|
| Temperature Sensor  | Sensor     | Active    | 27 °C    |
| PIR Sensor          | Motion     | Active    | Detected |
| Air Quality Sensor  | Gas        | Online    | Good     |
| Raspberry Pi Pico W | Controller | Connected | Wi-Fi    |

## Embedded Image

End of test document. Expected extracted elements: text + one table + one image.
